

8.10 – Fire Inspection

The General Assembly shall enact legislation that permits the Department of Revenue, if it deems necessary, to issue rules that would require, or permit localities to require, adult-use marijuana cultivation licensees to have an annual fire inspection of each of his or her cultivation facilities conducted by the fire department having jurisdiction over the location. Each fire department may determine whether there are any adult-use marijuana cultivation facilities in its jurisdiction by consulting with the appropriate local authority. For each location in its jurisdiction, the fire department may make an annual inspection. The fire chief of the jurisdiction may charge a fee not to exceed one hundred dollars for the inspection.
